

PROOFY

a Web3 platform for skill verification and achievement tracking. We empower individuals to prove their experience, skills, and participation in any activity — from hackathons and volunteering to coding bootcamps and workshops. Think of us as your on-chain portfolio of trust.

PROBLEM

Today, people can't easily prove their skills or contributions outside of formal education.

CVs and LinkedIn rely on self-reported claims — hard to verify.

Achievements like hackathons, teamwork, volunteering, or online learning remain invisible and unverifiable.

Current proof systems are either too public, too complicated, or lack credibility.

SOLUTION PROOFY

Transform any real achievement into a non-transferable NFT (SBT badge).

Combine soft skills (leadership, collaboration) and hard skills (coding, design, analytics).

Privacy-preserving: powered by zero-knowledge proofs.

Universal integration: from hackathons to NGOs to learning platforms.

TOKEN

All verified users have a token.

TECH STACK

Frontend: React, Next.js, Tailwind,
Scaffold-ETH
Backend: Node.js, Express
Smart Contracts: Solidity, Hardhat,
OpenZeppelin
Blockchain: Status Sepolia
(gasless)
ZK Proofs: Circom, Noir, snarkjs
Auth: Web3Auth, MetaMask
Storage: IPFS, Pinata

PROOFY

CLOSING — THE FUTURE OF PROOF

Skills are more than words — they're experiences, actions, and proof

Proofy is building a new language of trust, where every achievement — technical or human — becomes verifiable, private, and proudly yours.
